Budapest (Hungary)

EDUCATION

Bachelor of Engineering
– BE, Electrical and
Electronics Engineering

University of Debrecen
2017– 2020

SKILLS

- Html, Css
- JavaScript
- Tailwind Css
- React JS
- Basic
- Photoshop
- Team worker

LANGUAGES

- ENGLISH
- HUNGARIAN

WORK EXPERIENCE

Frontend dev

I am a self-taught frontend developer who started learning coding in my free time, and now I want to change my career. I have learned the following tech stacks: HTML, CSS, Tailwind, JavaScript, and React. However, I'm always looking to expand my knowledge. That's why I'm constantly working on my portfolio and uploading new projects. You can check them out at the following link: csabuel.github.io/csabuel-portfolio/.

NIX tech

2023.nov – 2024.feb

Besides my full-time job, I embarked on a 4-month internship course at NIX Tech. During this intensive program, I collaborated with teams on diverse projects, gaining valuable insights from a dedicated mentor who equipped us with a strong foundation for our journeys as developers.

Through engaging lessons and challenging homework assignments, I honed my skills in HTML, CSS, JavaScript, and React. Utilizing GitLab, I showcased my final projects and received constructive feedback from various mentors throughout the course.

It was an amazing experience to witness firsthand how developers collaborate effectively as a team.

Electrical engineer

2020 – today

E.ON

- Central and low voltage network construction contract management
- Contractual obligations inspection
- Verification of earthwork performance certificates for ground cables and aerial cables
- Contact person for contractors
- Preparation and verification of tender materials
- Basic knowledge of LEAN
- Working in team and working by deadline

Electrical Engineer Trainee

2017–2020

E.ON

During my university studies and the completion of dual training, as well as due to continuous contact with clients, I managed to improve my verbal and written communication skills. I use these skills in my current position too, I constantly give presentations to the contracted persons and inform them about current changes.
